

### The Scenario

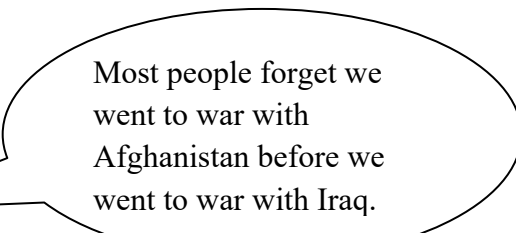

You hear increasing news reports of US plan to attack Iraq. The Arab world (Islam) begins to unite against such an attack, yet recent news reports suggest that the US is forming plans to attack Iraq before the end of November, 2002. Reports indicate that this would be followed up with increased pressure on other Middle Eastern countries to halt work on weapons of mass destruction. Incidents over the northern and southern no-fly zones of Iraq are increasing with more frequent bombings of Iraqi anti-aircraft and radar installations. US troops and equipment are being amassed in various regions of the Middle East and US military reservist and guardsmen have been told to expect another year or two of active duty. People in the US are vaguely aware of these events and continue life as normal.

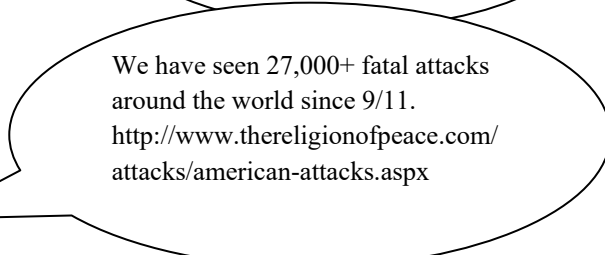

Done. We went to war with Iraq.

Some time passes.

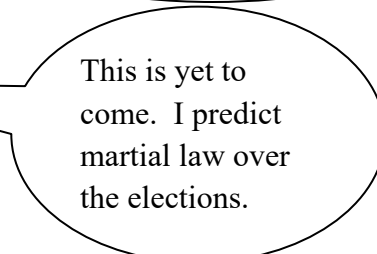

A declaration of war: the US is at war with Iraq. Initially there are massive air strikes as were in Afghanistan. These are followed with ground troops sent to root out the current government regime and their military. Unrest grows throughout the Middle East and violence increases against Israel. Acts of terrorism in the US increase sharply and you hear of relocation camps, similar to those during WWII for the Japanese, being established and filled with

Most people forget we went to war with Afghanistan before we went to war with Iraq.

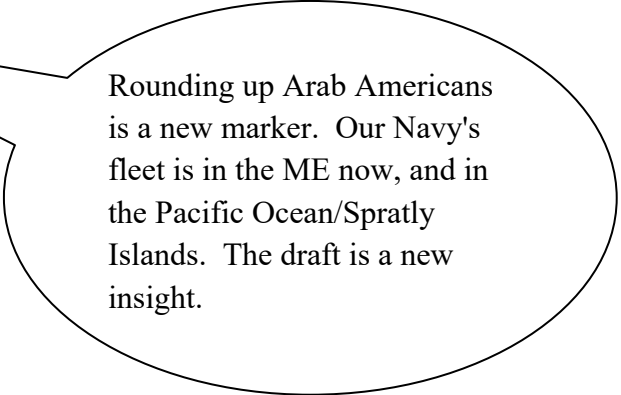

We have seen 27,000+ fatal attacks around the world since 9/11.  
<http://www.thereligionofpeace.com/attacks/american-attacks.aspx>

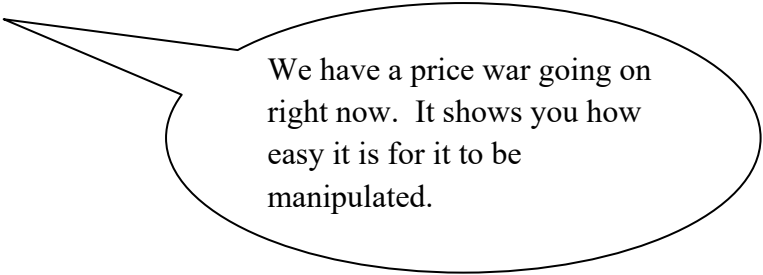

This is yet to come. I predict martial law over the elections.

American Arabs rounded up by the National Guard. A large portion of the US military and the Navy's fleet is occupied in the Middle East and other military hot spots abroad. Our young men are recruited and drafted into the military in increasing numbers. Many who would have served missions are drafted instead. Missionary service for young men becomes nearly impossible; the number of new missionaries begins to decline sharply.

Rounding up Arab Americans is a new marker. Our Navy's fleet is in the ME now, and in the Pacific Ocean/Spratly Islands. The draft is a new insight.

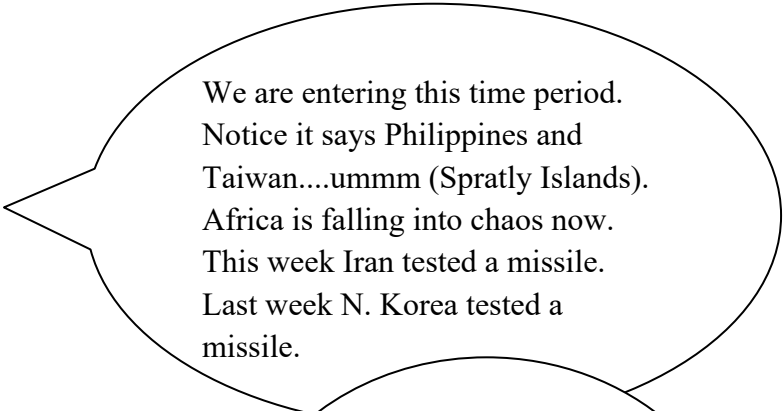

The Arab states begin to significantly reduce oil exports to the US and prices quickly increase to over \$3.00 a gallon. While there are many other sources of oil, there is still a sufficient disruption in supply to cause shortages and sharp price increases. Various gas rationing programs begin around the country as fuel is allocated for military use first and civilian use second. Gas lines reminiscent of the 70's are found across the country.

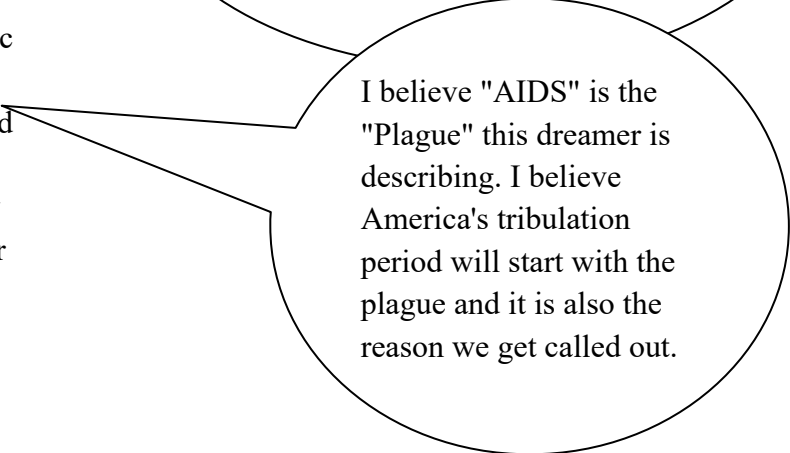

We have a price war going on right now. It shows you how easy it is for it to be manipulated.

Some time passes.

The war spreads to include many of the Arab nations, including Egypt and other portions of Africa. Terrorist outbreaks and civil unrest increase world-wide; you hear the news stories from Europe, South America, the Philippines, Taiwan, Africa, Russia, Canada, and the US. Africa falls into chaos as tribal wars increase, as Islamic militants spread through that country, as drought, famine and AIDS kill millions, and the Christians and white farmers are attacked. You hear news reports that many of the Russian countries are reuniting under

We are entering this time period. Notice it says Philippines and Taiwan....ummm (Spratly Islands). Africa is falling into chaos now. This week Iran tested a missile. Last week N. Korea tested a missile.

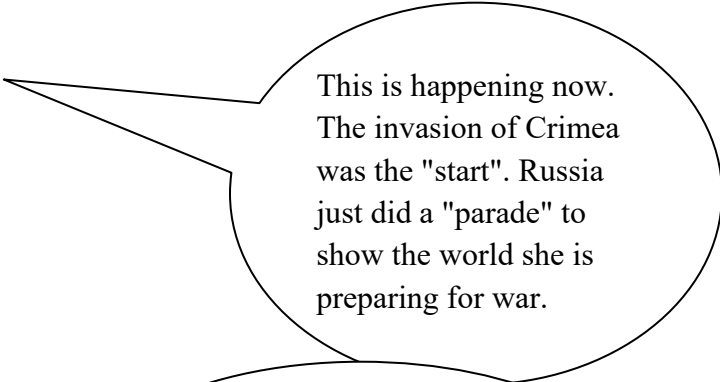

I believe "AIDS" is the "Plague" this dreamer is describing. I believe America's tribulation period will start with the plague and it is also the reason we get called out.

Communism, bringing their missile systems back on-line and rebuilding their military.

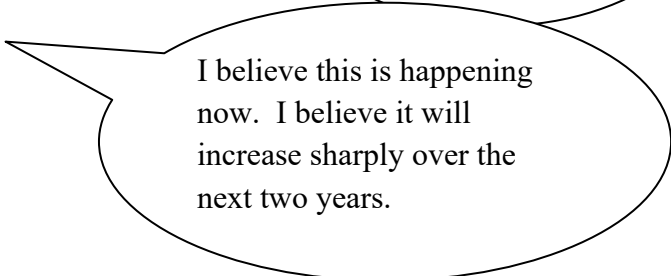

Some time passes.

You begin to hear of some who are moving to the valleys of the mountains, particularly from the West Coast. You hear rumors that some have been warned in dreams and promptings that it would be wise to relocate. Some move to Idaho or Arizona due to unexpected job changes. Some have feelings they should move on but are unable to due to high mortgages, debt and inability to sell their homes.

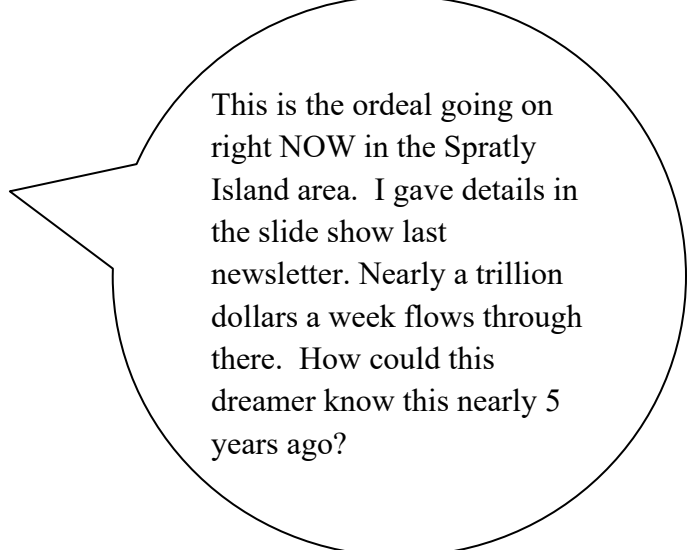

You hear news reports that China has begun controlling and blocking the world's major shipping lanes: the Panama Canal, the Suez Canal, the shipping lanes around the tip of Africa and the tip of South America and other world shipping routes. In order to persuade the US to stop the growing war in the Middle East, China begins to implement shipping embargos, similar to what the US has done to other countries around the world. International shipping to and from the US begins to dwindle, and trade between the US and all other countries is crippled. There begin to be shortages of many common goods and food items, and prices begin to skyrocket. The West Coast is hit particularly hard as it depends heavily on imported goods and foods from the ocean shipping lanes. Civil unrest begins to escalate significantly. You hear new reports of rioting, looting sprees, increased robberies, murders and kidnappings for ransom. Unemployment increases sharply as the impact of decreased world trade is

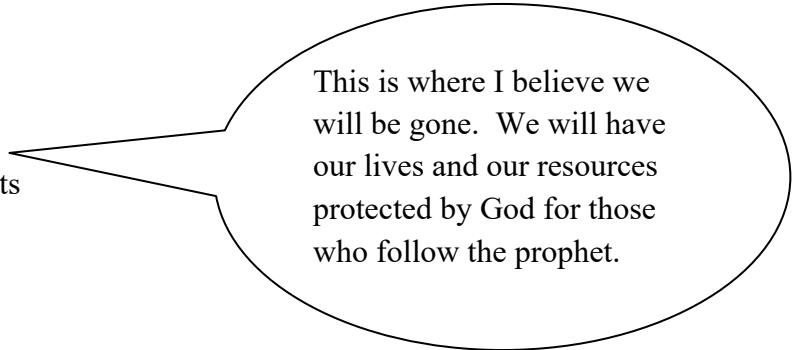

This is happening now. The invasion of Crimea was the "start". Russia just did a "parade" to show the world she is preparing for war.

I believe this is happening now. I believe it will increase sharply over the next two years.

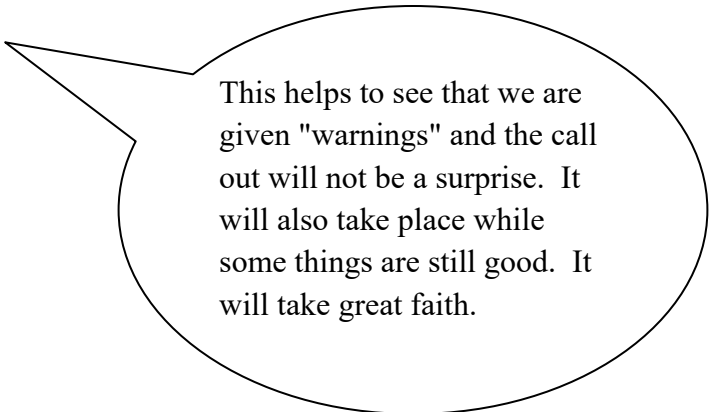

This is the ordeal going on right NOW in the Spratly Island area. I gave details in the slide show last newsletter. Nearly a trillion dollars a week flows through there. How could this dreamer know this nearly 5 years ago?

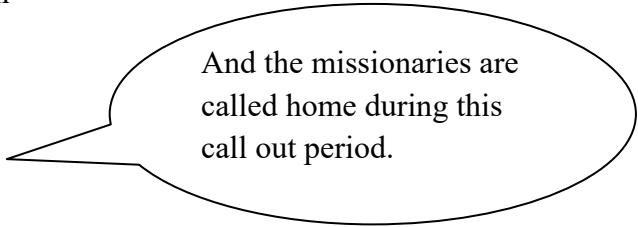

This is where I believe we will be gone. We will have our lives and our resources protected by God for those who follow the prophet.

absorbed by the economy. It becomes nearly impossible to sell homes, cars and other major items. Goods on store shelves are increasingly in short supply. Those with some food reserve fare better than most.

There is an announcement in the Church, without fanfare, a general counsel for those on the West Coast to get their affairs in order quickly and move their families to the valleys of the mountains. Sell homes and businesses. Sell or give away all unnecessary belongings. Pay off debts and bring any food storage as a priority. You hear that food availability may be in short supply in the valleys. The counsel included warnings that before coming, debts must be paid, obligations fulfilled, and that any who delay may encounter significant difficulties. You hear of many who want to go but, because of debt and inability to sell their homes, are unable to at this time. Others ignore the counsel because of their situation is still good and they don't see why such counsel should be given in the face of new opportunities. You hear news that, as war increases, the Church is withdrawing the missionaries from most countries in the world.

This helps to see that we are given "warnings" and the call out will not be a surprise. It will also take place while some things are still good. It will take great faith.

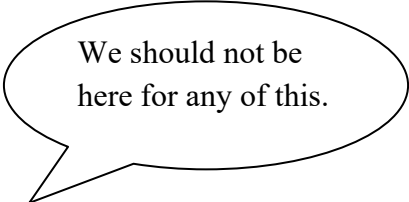

And the missionaries are called home during this call out period.

Some time passes.

The war in the Middle East continues to demand an increasing offensive by the US military. The drafting of our young men continues in ever increasing numbers. There are many casualties around the world mainly through terrorist attacks on our men. US troops are nearly fully occupied on foreign soils. The National Guard is occupied on

the home front with riots, terrorism, and other civil instability across the country, particularly in the West. You hear news of **martial law** being imposed in many areas for increasing periods of time. Overall, people around you continue to live as best they can with the ever increasing prices and shortages. Entertainment becomes the primary pursuit of many; alcoholism and drug use are increasing to never before seen levels.

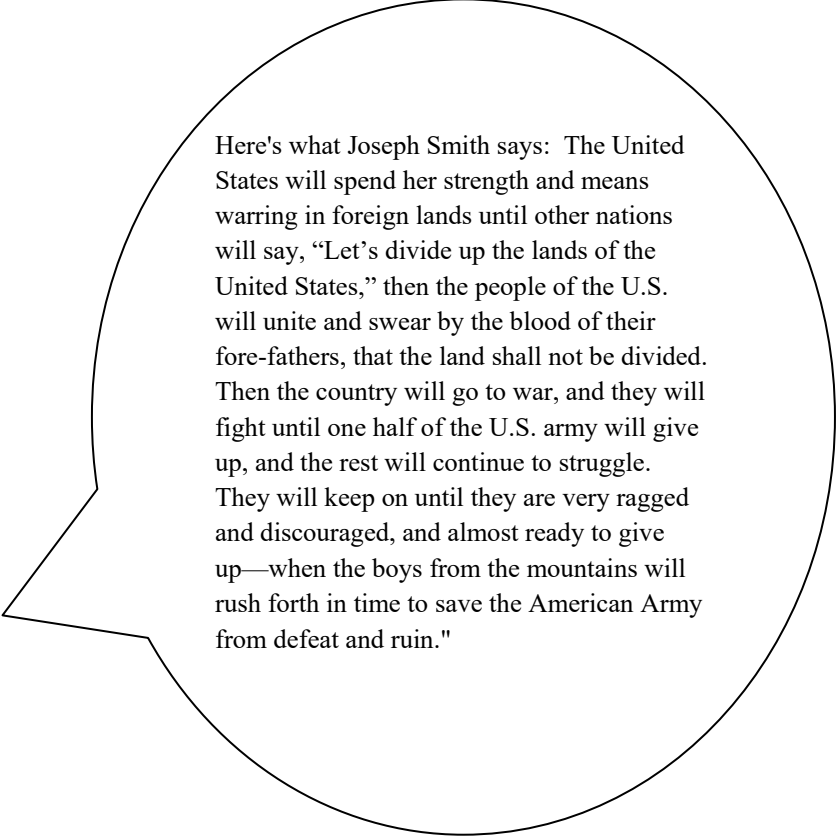

We should not be here for any of this.

Some time passes.

You hear news of a new battle front and a new enemy. The US Navy begins to battle China over the shipping lanes. All US warships are put into service to try to re-open the world's shipping lanes. China engages the US Navy with its fleet of submarines and battle ships. Russia comes to the aid of China with its numerous fleets. Many US warships are destroyed by the Chinese and Russian fleets. You hear news reports that China and Russia are planning to join forces to bring peace to the world.

Some time passes.

War breaks out on American soil. You hear the news reports that Russia has attacked Alaska and takes control of it. The oil flowing through the Alaskan pipeline is cut off and the oil supply to the West Coast is severely crippled. China launches a missile attack from Panama on the oil fields of Texas and Southern California. The civil situation in Southern California and much of the West Coast begins to decline sharply. Normal day-to-day activities cease, no gas is

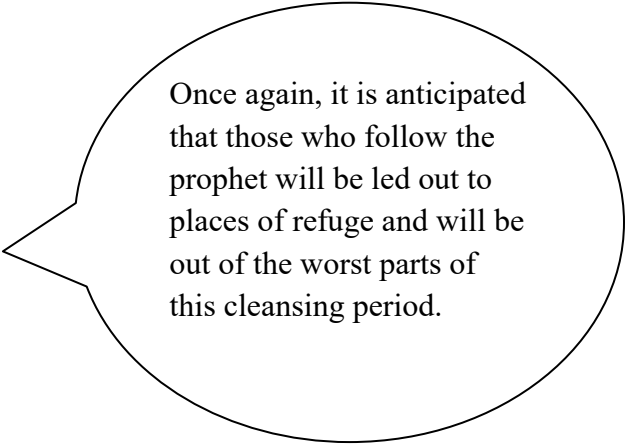

Here's what Joseph Smith says: The United States will spend her strength and means warring in foreign lands until other nations will say, "Let's divide up the lands of the United States," then the people of the U.S. will unite and swear by the blood of their fore-fathers, that the land shall not be divided. Then the country will go to war, and they will fight until one half of the U.S. army will give up, and the rest will continue to struggle. They will keep on until they are very ragged and discouraged, and almost ready to give up—when the boys from the mountains will rush forth in time to save the American Army from defeat and ruin."

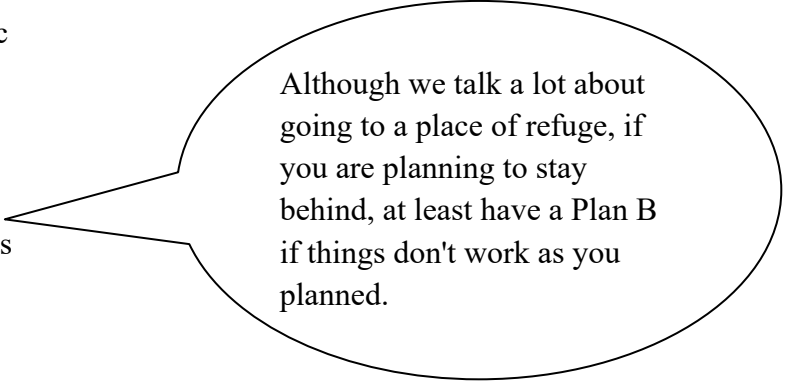

available for cars, trucks or farm equipment. Supermarket shelves go empty. Rioting and looting become the norm as mobs of people search for food, mostly on foot. Electricity, gas, water and sewer systems fail. Most TV and radio broadcasts cease. Hospitals shut down due to lack of power and supplies. Manufacturing and business ceases. Mobs from one neighborhood descend on others in search of food. Many are killed, or die from starvation and sickness, and there are none to bury the dead. Cities collapse. Armies of mobs flood out into country towns in search of food. You hear new reports that farmers are being driven from their lands as their fields and livestock are decimated by hungry and violent mobs. The National Guard pulls back as they are overcome by the mobs; there is nothing they can do to help as they too are cut off from food and supplies.

Some time passes.

You hear news reports that China has landed troops on the West Coast, bringing them by the hundreds of thousands across the Pacific Ocean in huge cargo ships, the same ships used to bring goods made in China before the wars. The Chinese army establishes bases of operation in Portland and Vancouver, British Columbia. News reports indicate that they are moving troops inland on barges up the Columbia River. The Chinese army splits the western states in two, moving down into California from Portland and down into Washington from Vancouver. News reports also indicate that the Chinese army is moving up into the US from Panama via Mexico. The inhabitants of great cities are forced towards each other

Once again, it is anticipated that those who follow the prophet will be led out to places of refuge and will be out of the worst parts of this cleansing period.

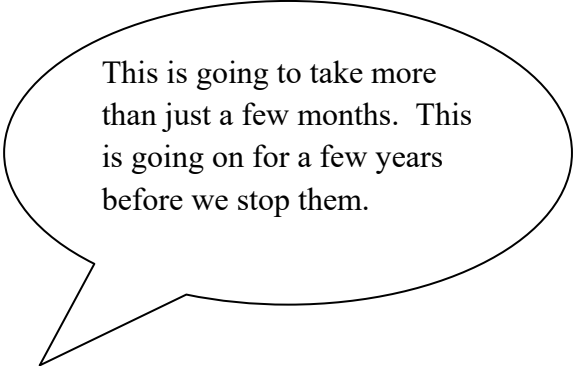

Although we talk a lot about going to a place of refuge, if you are planning to stay behind, at least have a Plan B if things don't work as you planned.

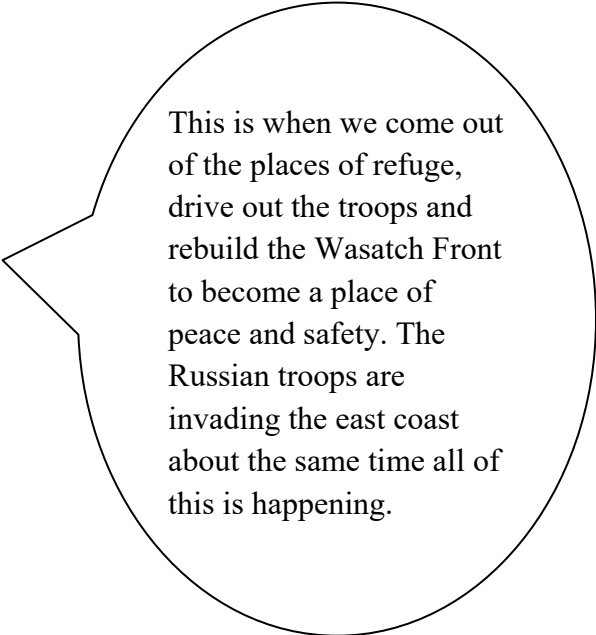

to battle one another for food. West Coast citizens, particularly those in California, who have survived the mobs and famine try to flee east for food, and to escape the advancing armies. Without gas or vehicles they are largely cut off by the deserts of Nevada. The Chinese are taking possession of the West Coast of the US.

People in New Mexico, Idaho, Montana, Nevada, and Utah begin to flee by the tens and hundreds of thousands to the east to escape the advancing Chinese army. The US and Canadian militaries establish a defensive line from west Texas up along the border of Utah and Nevada and up the Bitterroot and Rocky mountain chain into Canada. The people who remain in the Utah, Idaho and Arizona areas are enlisted to help hold this Western defensive line. The Chinese army is held at this line, taking control of America's west coast.

Oil fields in Utah are tapped and billions of dollars are poured into building up equipment and infrastructure in and around Utah for purposes of defense. Many people **east of Utah** begin to move farther east out of fear that the Chinese army may break through the line and take more of the country. **As these people leave, the valleys of the mountains become isolated from the rest of the country and become a place of peace and safety surrounded by destruction.** Within this land, the people become increasingly independent of all others, with only their own skills, talents and work to depend on.

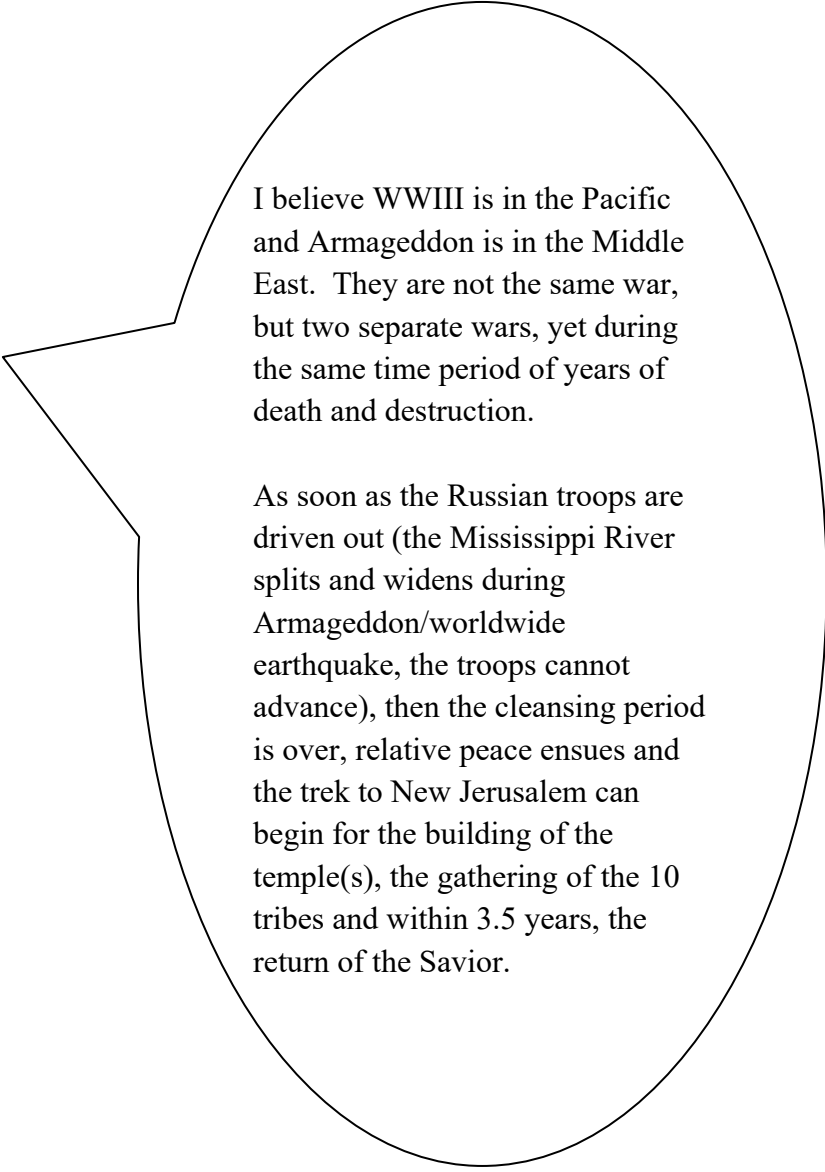

This is going to take more than just a few months. This is going on for a few years before we stop them.

This is when we come out of the places of refuge, drive out the troops and rebuild the Wasatch Front to become a place of peace and safety. The Russian troops are invading the east coast about the same time all of this is happening.

You hear news of other attacks on the US, missiles and troops from Cuba coming into Florida, and bombing runs from Russia and China coming into the Eastern States. You hear of Russia marching on European cities with Britain and France combining to oppose her advance. You hear of famine and disease spreading across the country. The war with Iraq grows to consume the whole world, with devastating consequences to the United States. WWIII has begun.

Some time passes as the winding up scene continues to unfold, with much more to come.

I believe WWIII is in the Pacific and Armageddon is in the Middle East. They are not the same war, but two separate wars, yet during the same time period of years of death and destruction.

As soon as the Russian troops are driven out (the Mississippi River splits and widens during Armageddon/worldwide earthquake, the troops cannot advance), then the cleansing period is over, relative peace ensues and the trek to New Jerusalem can begin for the building of the temple(s), the gathering of the 10 tribes and within 3.5 years, the return of the Savior.
